Milestone 3 - To Do

Frontend
- add styling to header component and category components
- Add styling to profile, login, my services
- Add form for booking request
- Add notifications if booking request was made
- Show booked services in your profile
- Alert that service was created, routing to profile
- Alert that you have been registered, routing to home

Backend
- booking requests

Open
- Should a customer have the ability of uploading an image?
- Special feature?
  - Communication between service provider and customer
  - (maybe change language?)

Deadlines next week
- booking requests should be possible
- Overall styling
- Notifications and alerts
